4. NP Document Update	JH has completed the recommended NP restructuring and MP is currently conducting a coherence check against the NPPF, JLP and SDP. The only significant addition will be the sites section which will be added once the AECOM site assessment report has been received and scrutinised. It should then be ready to be released to the PC.  <b>The draft Design Statement has been circulated to the team and all are requested to comment on it.</b>	All	7 Oct 20

5. Potential Sites	Assessment criteria in addition to those used in the JLP have been agreed with AECOM for use in their independent site assessment. This will allow all sites to be assessed against identical criteria that have local relevance and should result in a report that identifies those sites which best fit the local need. Unaccompanied site visits are expected to occur during the week beginning 5 <sup>th</sup> October.	RA
